PROFILE

Full Stack Engineer specializing in scalable backend systems, API integrations, and modern frontend development with React. Experienced in building high-performance eCommerce platforms, automation pipelines, and cloud-based applications. Strong focus on clean architecture, system optimization, and delivering production-grade solutions.

SKILLS

Languages & Frameworks: Python, JavaScript (ES6+), PHP (Laravel), TypeScript, React.js, Django, Node.js, Angular

Frontend & Backend: HTML5, CSS3, Tailwind CSS, Bootstrap, REST APIs, SOAP/XML, OAuth 2.0, JWT, RBAC

Databases & Cloud/Tools: MySQL, MongoDB, AWS (EC2, S3), Docker, Kubernetes, CI/CD, Git, Github, Postman, Linux, Jira

EXPERIENCE

Y-Not Design & Manufacturing

Bangalore, India

Full Stack Developer

Jun 25 – Present

- Designed and implemented a distributed eCommerce middleware system integrating Shopify with 7+ supplier APIs, handling 80K+ SKUs with automated real-time synchronization, significantly reducing manual operations by 80% and improving data consistency across platforms.
- Build PO automation system using XML/SOAP, enabling end-to-end order flow and reducing order processing.
- Built a dynamic pricing engine (MOQ, margin, setup/run/decoration charges), improving pricing accuracy, reducing calculation errors, and driving a 7.5% increase in profit margins.

Auwave Technology

Bangalore, India

Software Developer

Apr 23 – May 25

- Developed full-stack applications using React, Node.js, and REST API architecture. improved feature delivery speed.
- Implemented secure authentication (JWT, OAuth 2.0, RBAC), enhancing application security and access control.
- Optimized database queries, reducing response time and improving application performance.
- Built reusable UI components, improving development efficiency and consistency across applications.

Codezeal Technology Pvt, Ltd

Bangalore, India

Python Intern

Jan 23 – Mar 23

- Gained hands-on experience in real-world project workflows, covering requirement analysis, algorithm design, logic building, and exception handling.
- Developed and delivered two individual projects and one team-based project using the Django framework, implementing backend logic, database integration, and MVC architecture.

PROJECTS

Multi-Supplier eCommerce Middleware Integrations

Aug 25 – Feb 26

- Built supporting features and automation layers for large-scale product synchronization and supplier API workflows.
- Processed large-scale data (40K+ SKUs) ensuring accurate and real-time product synchronization.

Cloud-Based Task Management (React + Spring Boot)

Jan 24 – Apr 25

- Developed full-stack app using React and backend APIs with secure authentication.
- Streamlined order processing and reduced manual intervention in fulfilment workflows.

EDUCATION

Kristu Jayanti University

Bangalore, India

Master of Computer Science in Applications

Dec 2023 – Jun 2025
