

RAJ KUMAR

SOFTWARE ENGINEER | FULL-STACK & BACKEND SYSTEMS

Bangalore, India | +91 9845145571 | rjksharma23@gmail.com | GitHub | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building production-grade web applications, eCommerce platforms, backend services, and third-party integrations. Experienced in API-driven systems, large-scale product synchronization, order automation, dynamic pricing, and cloud-based workflows. Strong background in PHP/Laravel, JavaScript, React, Python, SQL, REST/SOAP APIs, and AWS with hands-on ownership across design, development, debugging, deployment, and production support.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, PHP, SQL, HTML5, CSS3
Backend	Laravel, Node.js, Django, REST APIs, SOAP/XML, OAuth 2.0, JWT, RBAC
Frontend	React.js, Angular, Shopify Liquid, Tailwind CSS, Bootstrap
Data / Cloud	MySQL, MongoDB, AWS EC2, AWS S3, Docker, Linux, Git, GitHub, CI/CD
Integration	Shopify APIs, PromoStandards, XML/XSD/WSDL, Postman, Jira

EXPERIENCE

Y-Not Design & Manufacturing Full Stack Developer

Bangalore, India
Jun 2025 - Present

- Engineered a multi-supplier eCommerce integration platform connecting Shopify, Laravel middleware, internal order data, and 7+ supplier integrations, supporting synchronization and management of 80K+ SKUs.
- Developed automated catalog synchronization workflows for product, variant, inventory, pricing, and supplier data, reducing manual operational effort by approximately 80%.
- Designed and implemented purchase-order automation using SOAP/XML and PromoStandards, enabling orders to flow from Shopify through middleware to external supplier systems.
- Built supplier-specific PO generation and validation for line items, shipments, artwork, decoration locations, pricing, setup/run charges, billing, and fulfillment information.
- Developed a configurable pricing and margin engine supporting supplier-, category-, and variant-level rules, MOQ, setup/run/decoration charges, and margin guardrails; contributed to a reported 7.5% improvement in profit margins.
- Implemented scheduled synchronization workflows and diagnosed production issues involving missing variants, stale inventory, supplier API failures, pricing inconsistencies, and failed jobs.
- Integrated AWS S3 with Laravel middleware for centralized artwork storage and downstream supplier-order processing, and implemented PO request/response persistence and transaction-ID tracking for production traceability.
- Refactored complex Shopify product-page logic into modular supplier-specific components and reusable functions, improving maintainability of customization, pricing, and decoration workflows.

Auwave Technology Software Developer

Bangalore, India
Apr 2023 - May 2025

- Developed and maintained full-stack web applications using React.js, Node.js, JavaScript, and RESTful APIs across frontend and backend workflows.
- Implemented authentication and authorization using JWT, OAuth 2.0, and role-based access control (RBAC) to secure application resources.
- Optimized backend database queries and API interactions to improve response times and application performance.
- Designed reusable React components and shared frontend modules, reducing duplicate implementation and improving UI consistency.

Developed Django-based applications covering backend business logic, database integration, request handling, and MVC/MVT architecture.

Delivered two individual projects and one team project, gaining practical experience in requirement analysis, algorithm design, exception handling, debugging, and collaborative development.

SELECTED ENGINEERING PROJECTS

Multi-Supplier Commerce & Order Integration Platform | *Laravel* | *PHP* | *Shopify* | *REST/SOAP* | *XML/XSD/WSDL* | *MySQL* | *AWS*

Designed an integration architecture connecting a Shopify storefront with middleware and multiple supplier platforms including Starline, Vantage Apparel, Baystate, and Logomark.

Engineered PromoStandards-based PO generation with dynamic mapping for products, shipments, artwork, decoration configuration, pricing, and supplier-specific fields.

Implemented request/response logging and transaction tracking to improve debugging, traceability, and operational support for production orders.

Product Synchronization & Dynamic Pricing Engine | *Laravel* | *Shopify APIs* | *MySQL* | *Cron* | *Background Processing*

Built automated synchronization workflows supporting a catalog of 80K+ SKUs across multiple supplier systems.

Developed configurable pricing logic supporting margin rules, operational costs, quantity tiers, MOQ, setup/run charges, and decoration pricing.

Implemented supplier-specific synchronization and error-handling logic for inconsistent or unavailable external API data.

Product Customization & Artwork Processing Platform | *JavaScript* | *Shopify Liquid* | *Laravel* | *AWS S3* | *Zepto*

Developed a configurable personalization workflow supporting artwork uploads, decoration locations, imprint methods, colors, quantities, MOQ, and dynamic pricing.

Designed structured customization data that flows from product configuration through cart/order processing and into supplier PO generation.

Integrated AWS S3 for centralized production-artwork storage and refactored large storefront logic into modular reusable components.

EDUCATION

Kristu Jayanti University
Master of Computer Applications (MCA)

Bangalore, India
Dec 2023 - Jun 2025
